MASFA Dinner Meetings – Get Yourself Connected

Thursday, April 5, 2018, 5 – 8 pm. Our dinner meeting is the best place in the Northern Virginia, Washington and Baltimore region to network with people in the cold-formed steel industry: Contractors, suppliers, manufacturers, and designers are always part of the mix. Our dinners provide you the opportunity to:

- 1) Network with industry colleagues during our cocktail hour.
- 2) Learn about important industry topics (many of which include continuing education credits) from various industry experts.

Topic: Have Screws, Build With CFS

1.0 PDH

Speaker: Lewis Taback-Territory Manager, Grabber

Continuing Education Credits Available: 1.0 Engineering PDH Credits

Agenda Highlights: You can't build a CFS framing project, or attach sheathing to CFS studs and joists, without using screws. And there is a lot to know about choosing the correct screw for each application. Different screws provide different capacities for different kinds of connections. This presentation will give an overview of the types of screws that are available to use, give assistance to engineers in the proper screws to specify for different applications, and provide valuable information to field installers to ensure that connections are made correctly and efficiently. The presenter has 38 years of experience in the screw/fastener industry and can answer any questions you have and teach you anything you ever wanted to know about screws..
