## MASFA Dinner Meetings – Get Yourself Connected

**Thursday, November 19, 2015, 5 – 8 pm.** Our dinner meeting is the best place in the Northern Virginia, Washington and Baltimore region to network with people in the cold-formed steel industry: Contractors, suppliers, manufacturers, and designers are always part of the mix. Our dinners provide you the opportunity to:

- 1) Network with industry colleagues during our cocktail hour.
- 2) Learn about important industry topics (many of which include continuing education credits) from various industry experts.

## Topic: Drones – A New Way to Look at Construction

1.0 PDH

**Speaker:** David Goldsmith, Ph.D– Virginia Tech University.  
**Continuing Education Credits Available:** 1.0 Engineering PDH Credits

**Agenda Highlights:** New technologies in construction can assist in project efficiency and accuracy. Drones are not just for hobbyists anymore. Come learn how drones can help you inspect and observe your construction project, as well as add a little excitement. The Department of Building Construction at Virginia Tech has completed a first phase program of drone operations for building and site documentation. The upcoming second phase will include autonomous route following and robotic site documentation as well as experiments with LIDAR seeking to integrate with ground based reality capture laser scanning systems. The final goal is feeding back these models and as-built scans into BIM models as the building is being constructed. These systems are ready to deploy today for inspection, documentation, and the creation of the all-important owner-candy flybys.
