September 7, 2023, 5 p.m. – 8 p.m. – Union Jack's, Columbia, Maryland

MASFA Dinner Meetings – Get Yourself Connected

Thursday, September 7, 2023, 5 – 8 pm. Our dinner meeting is the best place in the Northern Virginia, Washington and Baltimore region to network with people in the cold-formed steel industry: Contractors, suppliers, manufacturers, and designers are always part of the mix. Our dinners provide you the opportunity to:

- 1) Network with industry colleagues during our cocktail hour.
- 2) Learn about important industry topics (many of which include continuing education credits) from various industry experts.

Topic: Don't get the Shaft when you Design or Build with Shaft Wall

1.0 PDH

Speakers: Chuck Webb, Technical Sales Manager–SE and MA Regions, ClarkDietrich
Don Allen, Technical Director, AWC

Continuing Education Credits Available: 1.0 Engineering PDH Credits

Agenda Highlights: Shaftwall framing offers a unique solution where accessibility is limited to one side of a wall. Contractor or engineer use shaftwall framing in 1- and 2-hr fire-rated wall construction for elevator shafts, duct enclosures, and stair walls. But what happens when an architect wants to by-pass floor levels, use shaft wall for exterior walls, or make shaft wall loadbearing? Or what if the wall height exceeds the limiting height? This presentation will address common construction obstacles when it comes to framing shaftwall by understanding the product limitations in which it was tested, who is responsible for issuing engineering judgement(s), and when to get the shaftwall stud manufacturer and gypsum board manufacturer involved with the design professional. This presentation will include real-world examples of bad detailing of shaft wall and illustrate how the contractor and specialty engineer managed the final design and construction.
